Rear Brackets

Front Brackets

Genesis 150 Struts

We recommend professional installation. If you choose to not have this product installed by a professional, we highly recommend that you exercise caution, care, and patience when installing this product as it involves drilling holes into your cart's body.
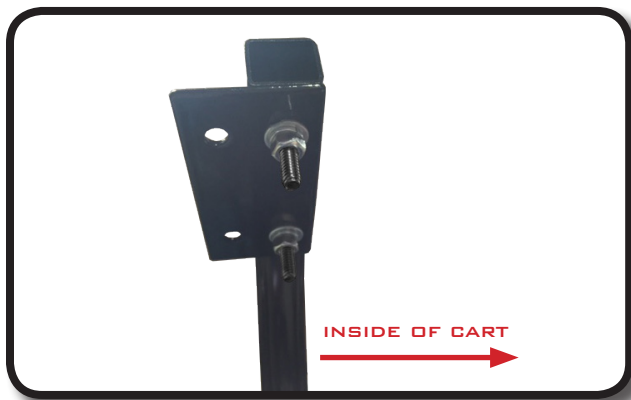

1

Remove factory canopy and rear struts. Retain hardware that is used to attach rear struts to G150 main bracket.

2

Attach front brackets to front struts using 8mm x 40mm hardware in factory mounting locations as shown. Tighten hardware.

INSIDE OF CART

3 Attach rear brackets to G150 struts using 6mm x 40mm bolts, nuts, lock washers as shown. Be sure to mount bracket using the smaller diameter holes. Strut will mount from the inside of the track.

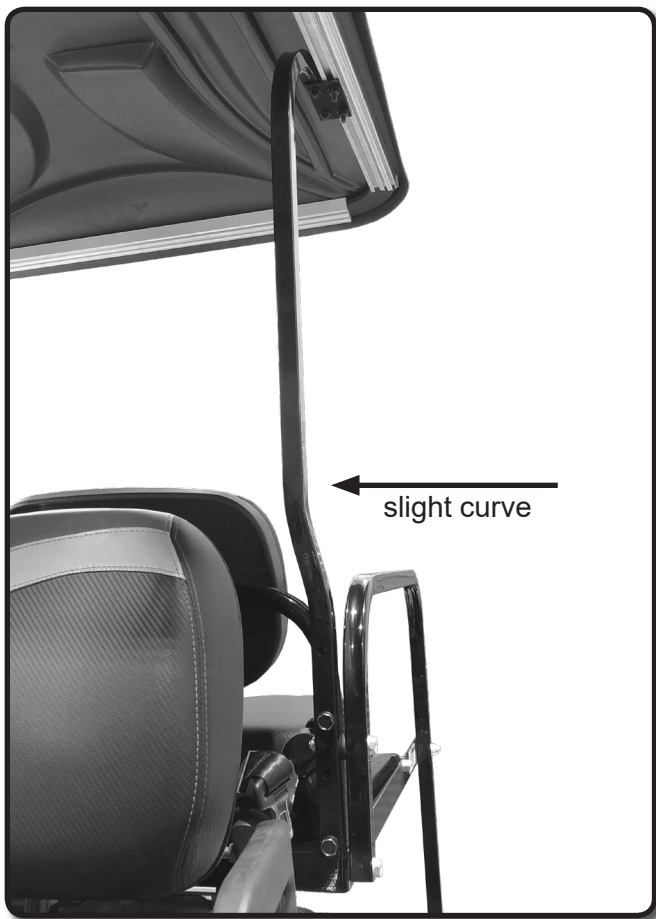

4 Using 10mm x 70mm bolts attach struts to seat back support bar as shown.

5 Now insert two 8mm x 25mm carriage bolts, washers, lock washers, nuts into each side extrusion at each corner of top. These bolts will secure top extrusion to strut brackets.

6

Connect the strut brackets to the top extrusion using 8mm carriage bolts, washers, lock washers, nuts. Hand tighten hardware first.

Front bracket

slight curve

7

When installed correctly, the strut will have a slight curve inward as shown. Once all bolts are in place then tighten.

NOTE: If installing a windshield make sure to install windshield before tightening top hardware.

Installation Complete
